

Issues found in Angadi

7 October 2026

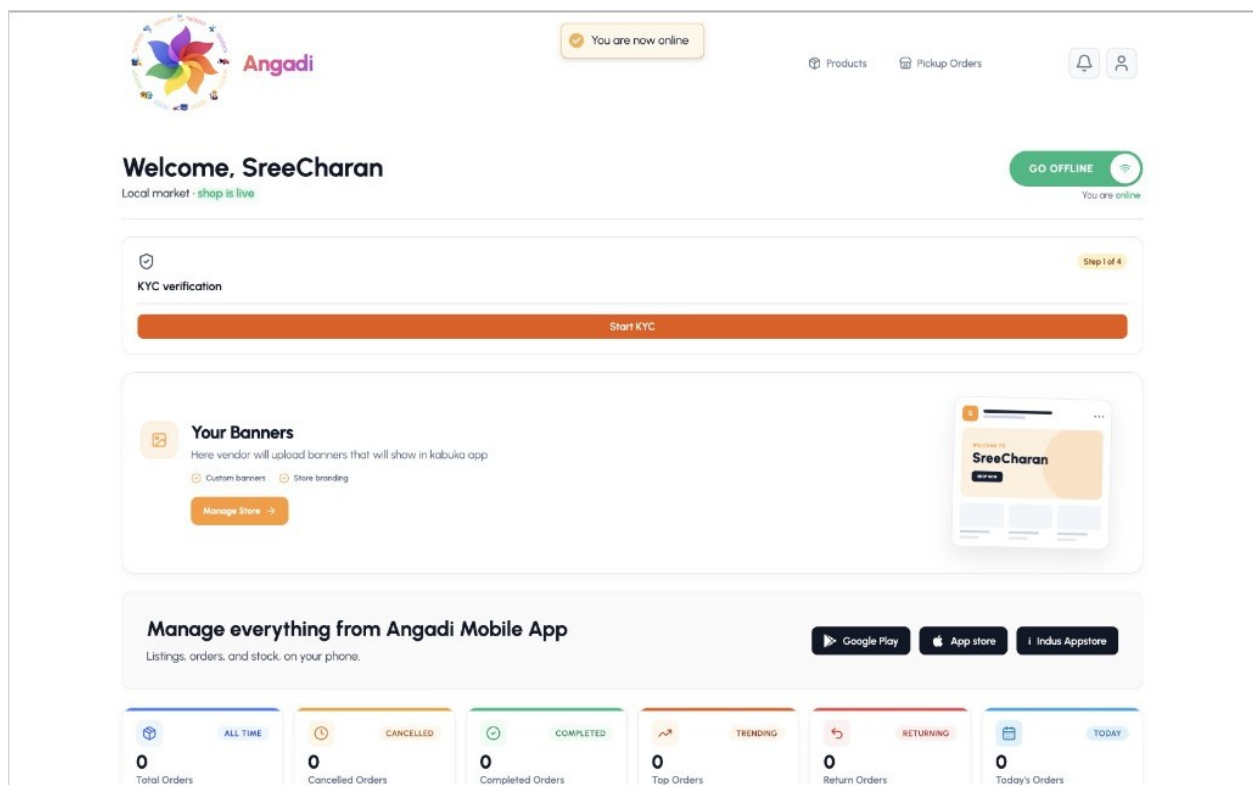

I checked angadi.net. Went through vendor signup and the dashboard. Landing page UI is good, sleek and clean. But that is not maintained inside the application. Most of the pages are still raw HTML. Need to re write them in React. Issues I faced are below, in the same order.

OTP time limit

For login and signup, OTP time is only 30 seconds. This is very less. By the time we open the message and come back, the code is already gone. Kindly increase the time for login and signup both. I dont have a screenshot for this one.

Go offline and go online

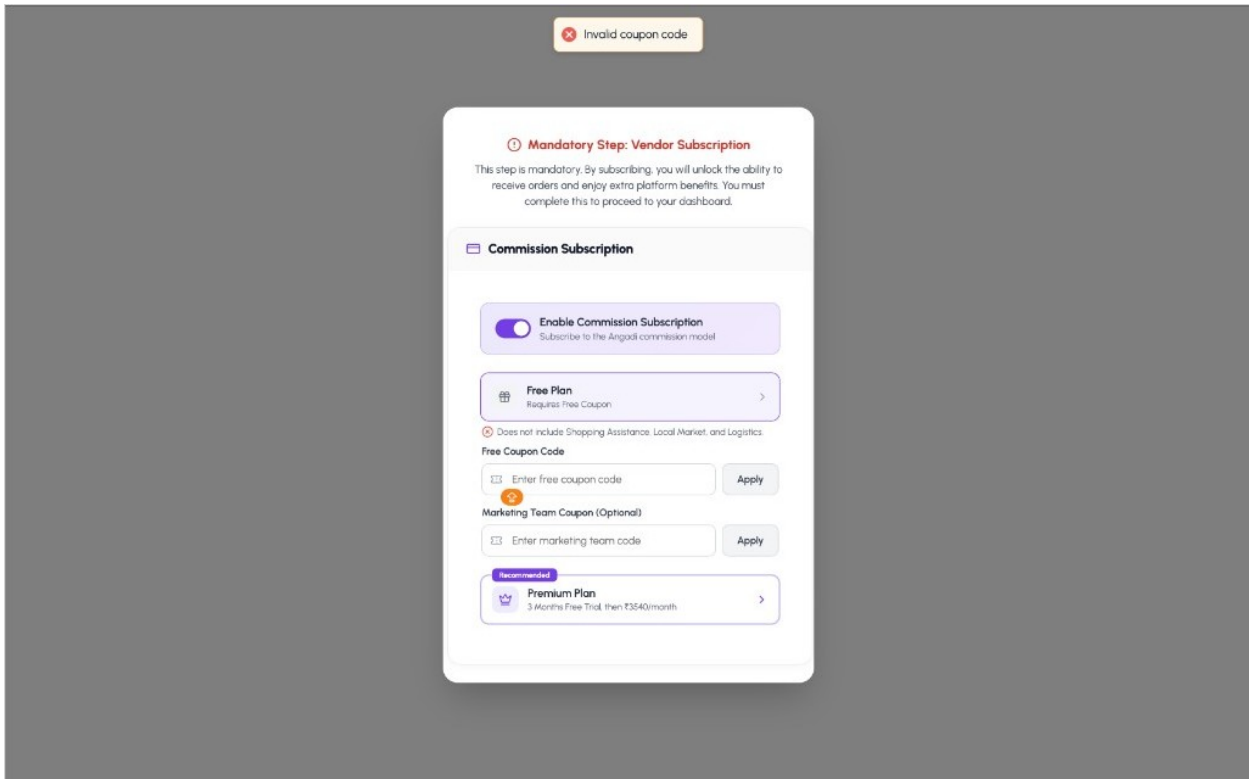

In the dashboard, if we click Go offline or Go online, the entire page is reloading. It should not reload the full page. Only the status should change. I was scrolled down and it sent me back to the top.

Go offline button is on the right side. On clicking this, full page gets reloaded.

Free coupon

Before dashboard, vendor subscription is compulsory. Free plan is asking for a free coupon. There is one more field for marketing team coupon which is optional. I entered a code and it showed Invalid coupon code. Nowhere it is written from where we will get the free coupon. Please mention that below the free coupon field.

Subscription step. Coupon came as invalid, and it is not told where to get the free coupon.

Email verification

In the identity step there is email address and a Verify button. I verified the email, went to the next step, and came back. Again it is asking to verify the same email. Next button is also disabled, and it shows please correct the errors highlighted above before proceeding. This happens many times whenever I came back from the later step. Once the email is verified, it should not ask again.

The screenshot shows a registration form with the following elements:

- Email Address:** A text input field with a red border and a "Verify" button to its right. Below it, a message says "Please verify your email address."
- PAN Number:** A text input field containing "JBDFF4534F". Below it, a message says "5 letters + 4 digits + 1 letter."
- Aadhaar Number:** A text input field containing "9836 4872 9847". Below it, a message says "Format: 1234 5678 9012".
- Upload Instructions:** Two large dashed boxes with an upload icon and the text "Click to upload or drag and drop" and "PNG, JPG up to 5MB".
- Error Message:** A red message says "Please correct the errors highlighted above before proceeding."
- Navigation:** "Back" and "Next →" buttons.
- Footer:** A link that says "Already have an account? Sign in".

Came back to this step and again email verification is asked. Address, PAN and Aadhaar I have covered.

Digilocker

Same form is asking PAN number, Aadhaar number, and upload of both cards. Digilocker verification is happening only after login. In the dashboard also, KYC is still showing as step 1 of 4 with Start KYC button. Digilocker should be done here itself, before login. Upload can stay if digilocker is not working. Don't ask for the same documents again after login.

Email Address

Verify

PAN Number

JBDFE4534F

5 letters + 4 digits + 1 letter

9836 4872 9847

Format: 1234 5678 9012

Click to upload or drag and drop

PNG, JPG up to 5MB

PAN Card

Click to upload or drag and drop

PNG, JPG up to 5MB

Back

Next ->

Already have an account? [Sign In](#)

This is the signup form. Digilocker should be here itself, not after login. Address, PAN and Aadhaar are covered.

Store activation code

In the business page, store activation code is required to go live. It is not mentioned what is the length of the code. I entered a very long string and it went outside the box. Please set one definite length, show it under the field like how PAN is showing 5 letters + 4 digits + 1 letter, and don't allow more than that.

Business

Business Information

Open Your Online Store
Create a digital storefront on Kabuka application ☒

Enable Wholesale Service
Offer products in bulk for B2B Vendors ☒

Store Activation Code
A valid agent code is required to go live.

Enable Video Call Shopping
Allow customers to connect with you via live video calls ☐

☐ I acknowledge that I am responsible for paying my own TDS and TCS taxes.

Store Name *

Store Image

Click to upload or drag and drop
PNG, JPG up to 5MB

Store Description

Activation code has no fixed length, so this long string is going outside the box.

Inside pages

Landing page I will not change. It is already good. Inside pages are not matching with it. Dashboard, subscription popup, identity form and business form are looking like raw HTML. Spacing and buttons are different in every screen. These pages need to be re written in React, using the same components as the landing page.
